

Strings

Char 'A' "ABC" ← String

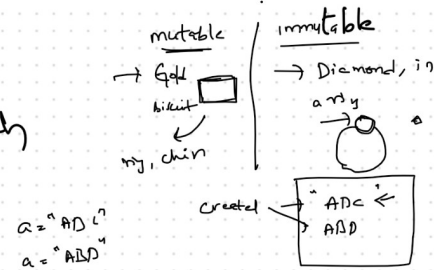

def: String is a collection of characters enclosed with in double quotes " " "ABC" → string

int a = 5
String a = "5"

- (1) In case of Java String is also an object
- (2) We can create a String using new keyword, as well as without new keyword
 - ✓ String str = new String("ABC");
 - ✓ String str = "ABC";

- (3) Strings are immutable in Java
- (4) Immutable objects are such objects which doesn't change after the object creation.

Different ways of Creating Strings

- (1) String str = new String("ABC");
- (2) String str = "ABC";
- (3) char arr[] = {'A', 'B', 'C'};
String str = new String(arr); → "ABC"
